Explaining gas charges

We measure the volume of gas you use in cubic feet (CCF) and then convert it to therms.

If you used a standard gas clothes dryer, it would take about 6 hours to equal 1 therm of energy.

About the balancing charge

The balancing charge includes pipeline, storage and other costs associated with seasonal peaks in usage. It applies from October to May.

Your net metering

As a net metering customer, you'll receive a bill every month based on your "net consumption" of electricity, measured in kilowatt-hours (kWh). The net consumption is the difference between the amount of electricity drawn from PSE&G when your generating system is not meeting your energy needs and the amount you delivered when you were producing in excess to your energy needs.
