**Total gas supply charges \$62.33**

**Total gas charges \$164.51**

### Explaining gas charges

We measure the volume of gas you use in cubic feet (CCF) and then convert it to therms.

If you used a standard gas clothes dryer, it would take about 6 hours to equal 1 therm of energy.

### About the balancing charge

The balancing charge includes pipeline, storage and other costs associated with seasonal peaks in usage. It applies from October to May.

### Price to compare

If you want to consider getting your gas supply from another supplier, you can compare their price with ours. This month, your cost for gas supply is \$62.33 (or an average of 0.39748994 per therm). This *price to compare* varies from month to month, depending on your usage.

### Your net metering

As a net metering customer, you'll receive a bill every month based on your "net consumption" of electricity, measured in kilowatt-hours (kWh). The net consumption is the difference between the amount of electricity drawn from PSE&G when your generating system is not meeting your energy needs and the amount you delivered when you were producing in excess to your energy needs.
